NETFLIX DASHBOARD

Netflix is one of the most popular OTT apps in the world. It has a large user base and almost 287 million subscribers.

Data contains country, rating, genre, type of movie, etc.

As Data Analyst we have to extract insights from the data by looking at the tasks and hints :

1. find out year-wise movies and TV shows.

2. Find out the total number of movies in each country.

3. find out the top genre on Netflix.

4. find out the distribution between Movies and TV Shows.

5. find out the total ratings given by show id(count it)

6. By filtering the Type, and Title data find out the Description, rating, Date Added, Release date, Duration, Genre.
